Scenario: Analysing US Toy Manufacturing using Tableau Dashboard

	Entice How does someone become aware of this service?	Enter What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit What do people typically experience as the process finishes?	Extend What happens after the experience is over?
Experience steps What does the person (or people) at the center of this scenario typically experience in each step?	Project presentation demo Faculty recommendation Internal business analytics requirement	Opens Tableau dashboard eviews summary metrics	Applies filters (State / Year) Explores trend charts Compares growth patterns Analyzes peak year trends	Exports dashboard as PDF Saves dashboard view	Reopens dashboard for comparison Updates dataset Adds new calculated fields
Interactions What interactions do they have at each step along the way? - **People:** Who do they see or talk to? - **Places:** Where are they? - **Things:** What digital touchpoints or physical objects do they use?	Views Tableau dashboard demo Reads project brief Reviews dataset summary	Observes Total Manufacturers Identifies Peak Year	Uses interactive filters Uses interactive filters Analyzes time-series data Uses Calculation Fields	Clicks Export → PDF/ Image Shares output with stakeholders	Refreshes data Modifies filters Adds new KPI
Goals & motivations At each step, what is a person's primary goal or motivation? ("Help me..." or "Help me avoid...")	Understand toy manufacturing trends Identify top-performing states Evaluate yearly performance	Get quick summary of performance Quickly understand overall industry scale	Discover growth or decline patterns Compare state-wise performance Identify highest performing year define usage and profits	Present findings in meetings Use visuals in project submission	Monitor manufacturing growth over time Improve dashboard continuously
Positive moments What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Clear project objective Structured dataset Professional dashboard layout	Instant KPI visibility Fast loading dashboard	Interactive filtering Clear trend visualization Easy comparison Clarity	Clean export format Professional charts	Reusable dashboard Responsive dashboard Easy data refresh
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	Large dataset confusion Unclear KPI definitions	Too many numbers at once Difficulty interpreting calculated fields	Filters may reset accidentally Data misinterpretation risk Required more comparisons More Charts based on user	Formatting differences in export Large file size	Manual dataset update Version confusion
Areas of opportunity How might we make each step better? What ideas do we have? What have others suggested?	Add short project summary slide Add dashboard explanation tooltips	Add KPI explanations Add small info icons for clarity	Add filter reset button Add highlighted peak year annotation Comparisons on all levels New charts for users	Provide export templates Optimize export layout	Automate data refresh Version control documentation User and Device Compatibility
